

It's Your Space-USE It!

Ways to Think about Gaining
Storage Space

Not an HGTV “Reno”

Smarter storage, not more storage

Attaching things to walls

Are your walls PLASTER or DRYWALL?

- Always drill a pilot hole in drywall
- Fastening to studs is always preferable

Locate studs

- Stud finder
- Logic (every 16 inches)

Know the weight of what you're hanging

- Bathroom scale, packaging, Google
- Divide weight by number of anchors you're using

Attaching things to walls

Plastic Sleeve Anchors

- Drywall or plaster
- Get the right anchor for the weight of your object
- Screwdriver or drill (plaster)

Attaching things to walls

Self-Drilling (Threaded) Anchor

- Drywall only
- Get the right anchor for the weight of your object
- Only need a screwdriver

Attaching things to walls

Molly-Bolt (Hollow Wall) Anchor

- Drywall only
- Get the right anchor for the weight of your object
- Drilling a hole is necessary

Attaching things to walls

Toggle Bolt Anchor

- Drywall and Plaster
- Get the right anchor for the weight of your object
- A drilled pilot hole is necessary
